

Care Technology Buying Solution

In partnership with the YPO, we have developed a new way for local authorities to deliver social care to individuals. Our online solution allows you to source care technology and equipment quickly and easily, from a quality assured and compliant market. The Care Technology Buying Solution, allows you to focus on meeting an individual's outcomes and source the right products for every situation regardless of supplier type, size or location.

We can source a wide range of innovative products and services, which can be easily found under five simple categories.

- 1 Technology Enabled Reablement and Rehabilitation Products and Services**
Which include Wearables, Mobile response services, Safety in the home, Prevention & detection of falls, call monitoring services, Seizure monitoring and more.
- 2 Technology Enabled Care Related Professional Services**
Which include Prosthetics, Robotics, Wheelchairs and mobility, Smart products, Sensory and immersive rooms.
- 3 Care Related Information and Communication Products and Software**
Including, Remote video consultation, Healthcare kiosks, Health and care related apps, Learning materials and curriculum.

- 4 Care Related Software**
Including Case management software, data and trend analysis software, Support planning software, Monitoring and rostering of care delivery/staff software.
- 5 Care Related Activity Detection, Monitoring and Prevention Products and Services**
Including Technology enabled care consultancy, Technology enabled care training and education.

The supplier marketplace is open at any time and to all suppliers providing they meet entry criteria. This allows the marketplace to continually evolve and change to meet demand, whilst providing you with greater choice, flexibility and access to innovation in Care Technology products and services.
