

Social Care Brokerage Hub Module 1

Accreditations & Enrolments

| Overview |

adam facilitates the commissioning of social care services through a cloud-based technology platform and managed service.

The *adam* social care commissioning solution puts the individual at the heart of the process. We find the best possible provider for each individual whilst giving councils complete control over the end to end system, always putting the individual first.

| Product Definition |

Our **dedicated service provider team** will research and engage with a broad base of providers, to onboard and create a diverse and compliant provider base. Our integrated demand site allows providers to access entry criteria details for joining your provider base, including live new requirements from local authorities. This stimulates an increase in the provider base and creates a fair and **transparent marketplace** for providers.

Providers will respond to the criteria set up by the local authority to enrol onto the system. Our dedicated team will handle this process, which includes accreditation questions, responses, all documentation and selecting the products and services that they can supply. This process meets **compliance with OJEU and PCR regs**. The local authority is ultimately responsible for the final approval of providers wishing to join the provider base.

How will this help **you**?

'We were wasting so much time manually keeping track of each supplier to ensure they remained compliant and their documents kept up to date.'

'Now we are able to manage our suppliers in one place and they are automatically notified if important documents are about to expire. This has saved so much time allowing us to focus on other aspects of our business.'

Don't just take our word for it...

Stats

- 24hr turnaround to fully enrol new providers
- Over 50% growth in provider engagement

Key Benefits

- Engage with a broad base of providers
- Create a diverse and compliant provider base
- Live new requirements from local authorities
- Fair and transparent marketplace for suppliers
